## **The Apple of Life**

The energetic structure of all of creation

Vortexes on the vertical suck in matter and forces,  
which are concentrated on the centre  
and then squirted out along the horizontal plane

The circles are the magnetic field  
created by this spinning movement

The small spirals within the vortexes indicating the organisation of the  
six dimensions.

# The Apple Of Life

(c) The Garuda Trust - All Rights

# Gyroscope and Orientations

The apple of life is a 2d representation  
on what is really a gyroscopic 3d being

Observe the difference between  
the north south axis  
and the zenith and nadir axis

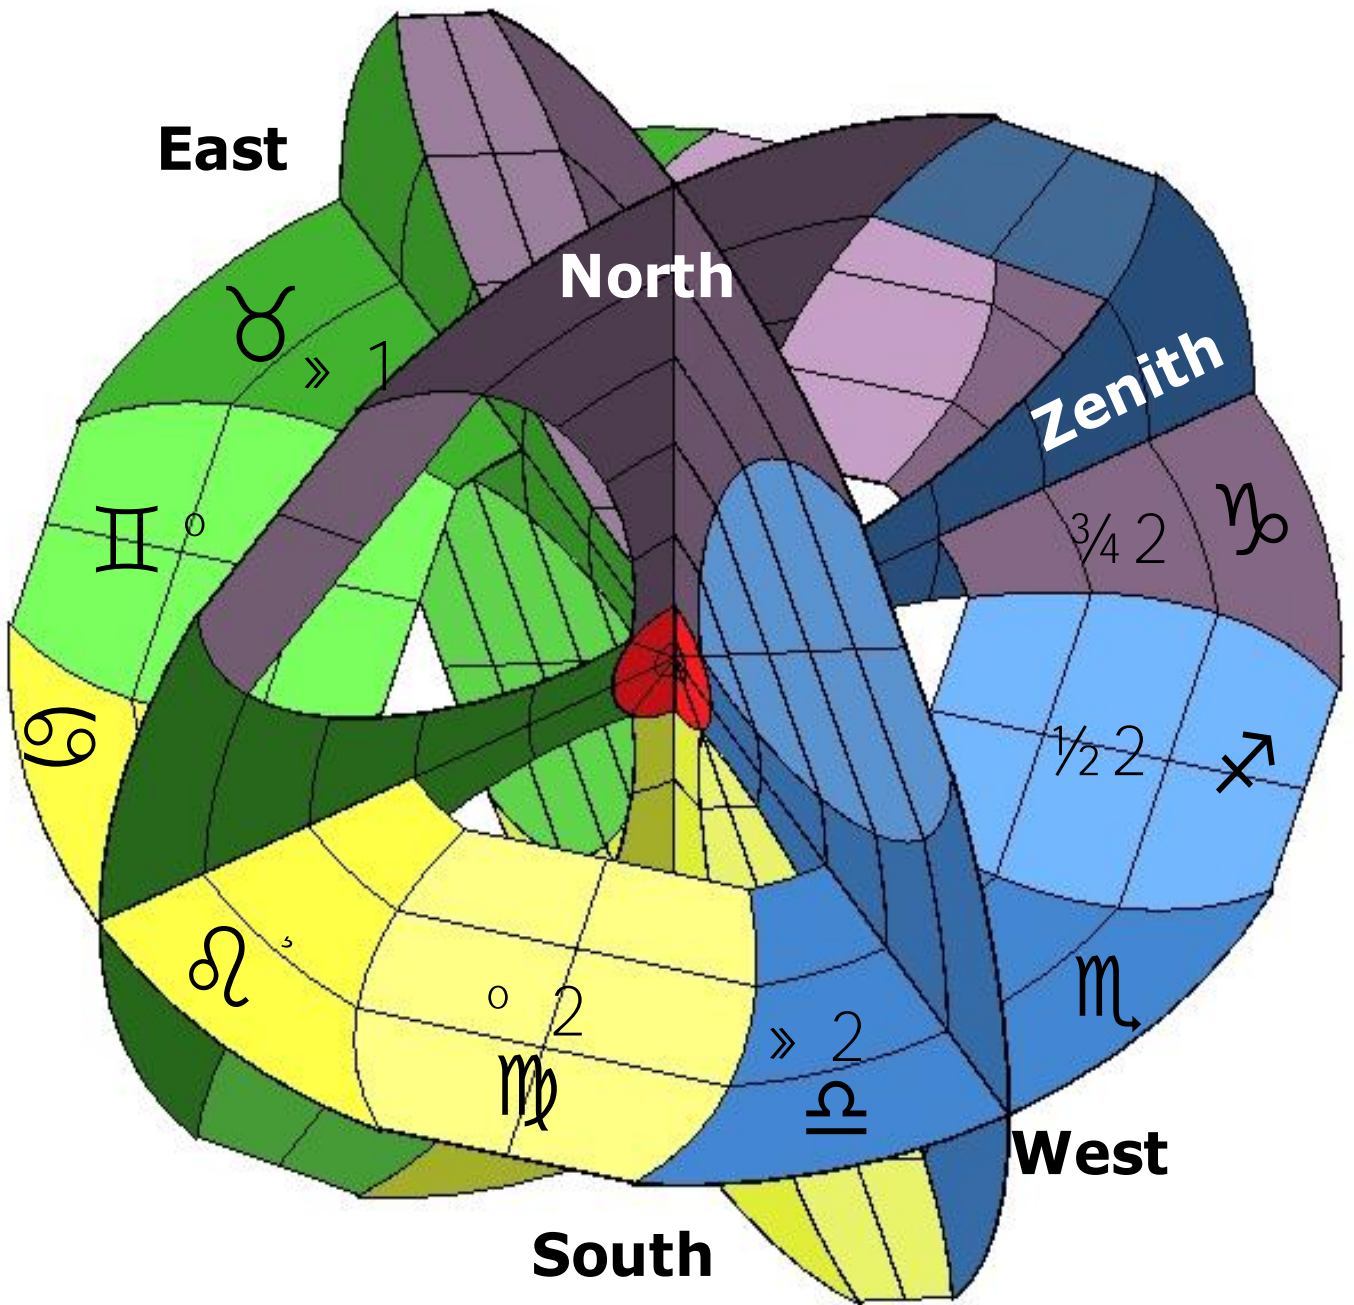

North South is the vertical  
Zenith Nadir are the horizontal

The planets and the constellations beyond them  
are all on the horizontal plane

Observe the 3dimensions of up and down  
Forward and backward  
Left and right

Observe how the organisation of the three planes  
occur when they cross each other

The pictures in this document up to  
'Periodic Table of Elements' ( plate 37 )  
are orientated upon the Zenith  
of the Northern Hemisphere  
From plate 38 onwards  
they are orientated  
on Magnetic North

## Gyroscopic perspectives

Observe the rings gyroscope (A)

Then what happens  
when only the places where  
chemical elements occur, are shown (B)

Observe the gyroscope  
with the energetic bodies form within life. (D)

Observe the difference between the main axis,  
where it crosses the horizontal axis,  
the vortexes are clearly one of the energetic activities  
ie green is the world etheric arm,

the secondary vertical axis  
where it crosses the horizontal,  
the vortex interaction is of  
the physical and etheric ,  
and the astral and spirit.

This shows a energetic difference between  
the character of the North South axis  
and that of the Zenith IC axis

In astrology and biodynamics  
we focus more on the zenith IC axis  
than the north south axis  
as we are dealing with in lifes manifestation.

## The Layers of Creation

The top spiral is the Astrological inward movement  
through the six dimensions

Constellations, planets, elements,  
modes duality, earth

The middle 'rings' diagram places this same information  
as individual rings and associates them to  
the energetic activities described by Dr Steiner.  
This is what is our experience of creation.

The bottom gyroscope shows what happens  
to the world activities once there is  
movement that supports life forms.  
The energetic activities polarise.

The world activities hold the vertical and horizontal axis  
as the primary cross, while the internalised activities  
of the lifeforms manifest as a secondary cross  
in between the world activities.

The right chart shows the 12 layers of creation

## Biodynamics Decoded

The 12 Layers (2 x6) are placed with the biodynamic information upon one vortex form,  
so relationships between it all  
can be established

The activity begins at the bottom of the spiral  
and grows in complexity as it moves upwards

The colours indicate the same activity  
at a higher level

The white plant in the middle of the vortex  
suggests the parts of the plant,  
and the energetic activity,  
each layer relates to.

Observe the relationships  
from layer to layer  
and within each layer

Place some of your own associations onto this model

Vortexes manifest within spheres  
and so the vortex information  
needs to be expanded to the gyroscope  
the bottom right gyroscope  
shows this development.

## Ag course 2

The second story of the agriculture course tells of how the activities work INSIDE living beings.

Things polarise

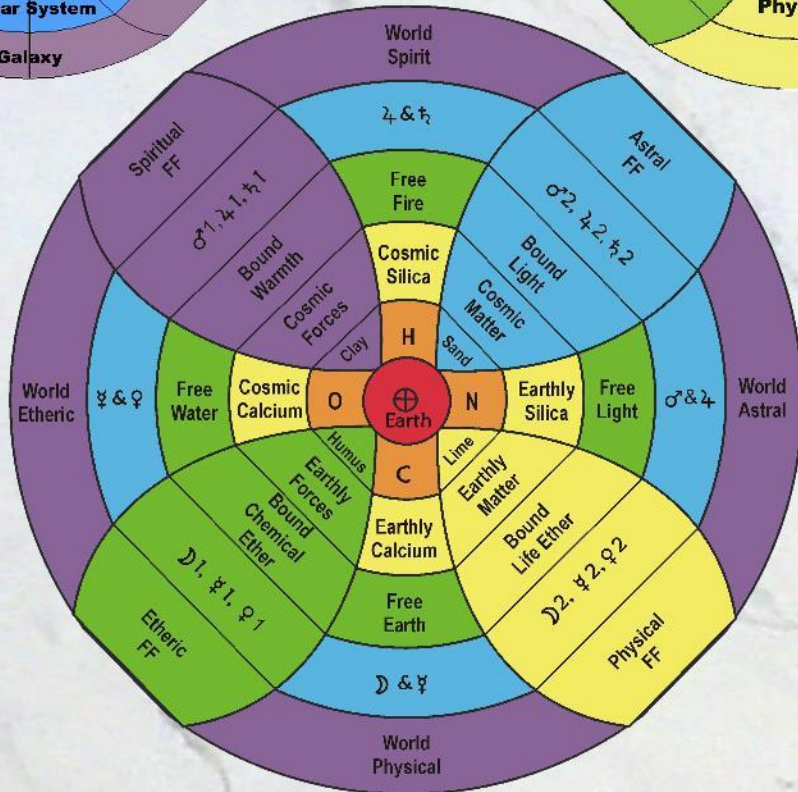

So we are taken one step further into manifestation through a lemniscate twist

Where

The internal etheric and internal spirit change places

And the physical organism is sustained through the Physical Formative Forces

## **Biodynamic Chemistry**

Given this is a story of universal order

Chemistry, must be  
a manifestation of this order.

The chemical elements activity must be  
described by the energetic glossary

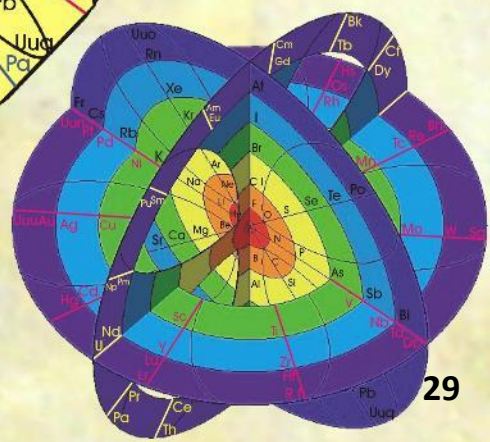

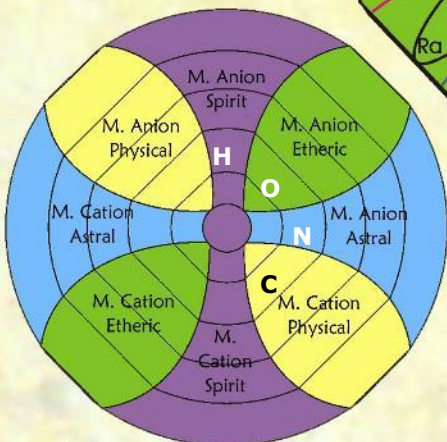

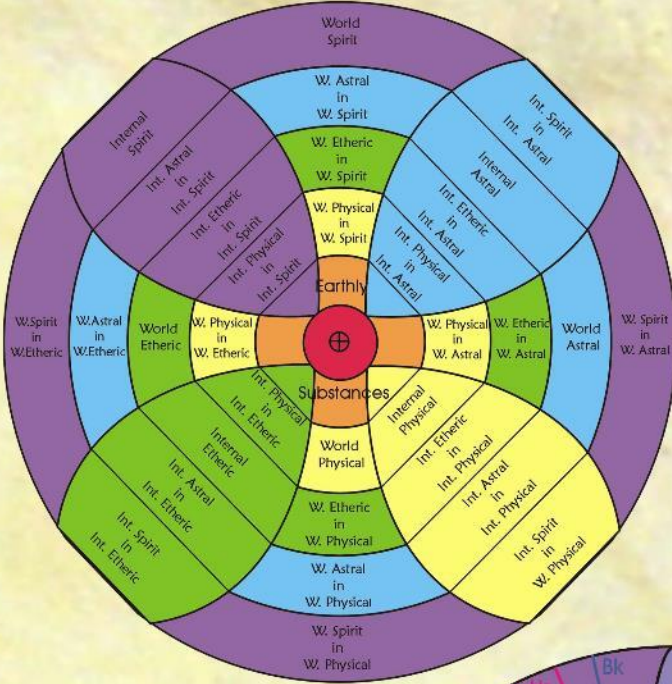

A third 'dimension' of the Periodic Table  
is seen when we use  
RS's story of chemistry  
based upon H,N,O,C

He describes a whole approach to chemistry  
where the Elements work at the most  
Physical level of manifestation,  
as polarised charged particles.  
see the bottom left diagram

Look for the three dimensions of activity  
for each of the elements.

## **Metallic States**

If we are to look in greater depth into the energetic organisation of manifest bodies we need to orientate the gyroscope upon the internal physical arm, rather than the world physical arm

This places Carbon **C** as the base of physical manifestation

The metallic states show a polarisation of the elements
